

Overview

Online assessments, web-based learning tools, and mobile devices are driving the future of education. Prepare your classrooms for the demands of the 21st century with the Mission Multiplier SATURN-i.

Give teachers ample access to the resources they need while simultaneously blocking students from content that would be distracting, inappropriate, or potentially harmful to your network with web filtering and next-generation firewalls that qualify under Category II of CIPA Compliance. Allow case-by-case exceptions and special permissions with flexible policy management. Make bandwidth issues during standardized testing or web-based lessons a thing of the past with custom bandwidth control. Protection, convenience, and education can now go hand-in-hand.

Solutions Perfect for Education

Take a look at some of the biggest benefits the SATURN-i has to offer K-12 schools, colleges, universities, and vocational schools.

Block Distractions and Inappropriate Content

Technology is great for the classroom. Distracting and inappropriate apps and websites are not. Web filtering and application control make blocking network access to inappropriate or distracting sites and apps both quick and easy.

Control Who Has Access to What

Students, teachers, staff, and administration don't all need access to the same things. The SATURN-i's Policy Manager makes it easy to define and manage unique policies with different network privileges based on type of user, location, and much more.

Simple Prioritization of Bandwidth

Bandwidth Control makes it easy for you to manage the priority of the traffic on your network so that students and teachers don't run into slowdowns during high-bandwidth, high-priority activities like online assessments and web-based learning.

Configuring SATURN-i for Education

Customizing the Mission Multiplier SATURN-i to your specific needs is simple and easy. Start with our suggested Education Configuration, then add or subtract apps to customize it to your liking.

SATURN-i Has You Covered

- ✓ Unique and granular policies for students, teachers, administrators, individual classrooms, school sites, and district offices
- ✓ Optimized bandwidth for high-priority traffic (online assessments, web-based learning tools, etc.)
- ✓ Simple tools for network administrators to quickly respond to the dynamic needs of teachers and staff
- ✓ Enables CIPA Compliance
- ✓ Makes concerns about BYOD a thing of the past
- ✓ Filters for social media and inappropriate or high-bandwidth content
- ✓ Mobile Policy Enforcement for 1:1 Initiatives
- ✓ Active Directory/LDAP Integration
- ✓ Real-time reporting that lets you drill down to view and control individual user activity
