Overview

Dispersed locations, staff operating remotely, headquarters offices with hundreds of employees, and a widespread framework of critical infrastructure make for a dangerous cocktail of vulnerability. Often, the teams responsible for mitigating this vulnerability and keeping utilities secure are very small. They need solutions that are cost effective, simple, and efficient in order to keep pace with the rest of the organization.

With the Mission Multiplier SATURN-i, teams can monitor and control traffic at headquarters locations and remote offices and substations, all from the comfort of a single room. They can block out threats to the system, manage the level of access given to in-house and remote users, and keep the organization compliant with major security standards, all with one convenient solution.

Solutions Perfect for Utilities

Take a look at some of the biggest benefits the SATURN-i has to offer utilities organizations.

Stop Threats in Their Tracks

Block would-be intruders, phishing attempts, viruses, ransomware, botnets, even annoying ads before they come anywhere close to infiltrating the system with a whole suite of protection and filtering apps.

Manage Unique Access Levels

Define and manage network privileges based on username, groups, time, day, protocol and much more. Remote workers, third-parties, and internal staff need different access levels. Achieving that is now easy.
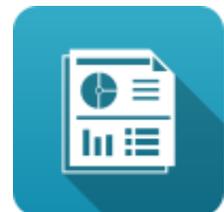

Make Audits Simple and Painless

Provide compliance auditors with exactly what they need with database-driven reports that can drill down into any aspect of the network traffic. Just as easily, perform internal audits to monitor security posture.

Configuring SATURN-i for Utilities

Customizing the Mission Multiplier SATURN-i to your specific needs is simple and easy. Start with our suggested Utilities Configuration, then add or subtract apps to customize it to your liking.
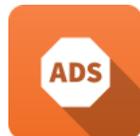

Firewall	Intrusion Prevention	Phish Blocker	Virus Blocker	Ad Blocker	Spam Blocker	Application Control

SSL Inspector	Web Filter	Bandwidth Control	IPsec VPN	Policy Manager	Reports	Command Center

SATURN-i Has You Covered

- ✓ Help satisfy federal, state, NERC, and other compliance standards
- ✓ Unique and granular policies for specific departmental and user access
- ✓ Stops filter avoidance
- ✓ HTTPS/SSL traffic inspection
- ✓ Active Directory/LDAP Integration
- ✓ Prioritize network traffic for mission-critical applications
- ✓ Layer 7 application awareness to identify all incoming application traffic regardless of port destination
- ✓ Stops viruses and other malware before they can enter your network
- ✓ Database-driven reports that can drill down into any aspect of the network traffic
