

Capabilities Overview

Cyber Security Solutions for Business & Government

Cyber Solutions For Government

We multiply the impact that our public sector clients can make against their mission objectives by providing subject matter expertise and thought leadership throughout the cybersecurity lifecycle.

Red Team & Penetration Testing

Utilize a potent mix of cyber experts, methodologies, and enemy perspectives to put your security to the test.

Program & Compliance Assessments

Our assessment methodologies are designed to help organizations ensure that compliance is never an issue.

Strategy & Policy

Develop security strategies and policies that further your ability to exceed organizational goals.

Organizational Design

Structure organizational models and security function blueprints around unique cybersecurity needs.

Performance Management/Metrics

Increase program performance through the purposeful measurement and management of key performance metrics.

Cyber Controls Deployment

Design security controls to appropriately protect the confidentiality, integrity, and availability of your information.

Continuous Monitoring & Risk Scoring

Use continuous monitoring and cyber risk scoring capabilities to establish and maintain security and compliance.

Business Process Re-Engineering

Redefine processes and implement the associated changes to reduce headaches, improve security, and increase efficiency.

Organizational Alignment

Achieve organizational alignment with new initiatives to support the long-term success and security of your organization

Business Impact Analysis

Define critical assets and evaluate the organizational impact of a security failure.

Cyber Solutions For Business

With Mission Multiplier's business-focused cyber security solutions, companies can access proven cyber subject matter experts on an on-demand basis to help satisfy the latest cyber regulations, and for a fraction of the price of hiring a full-time security team.

Red Team & Penetration Testing

Utilize a highly effective mix of cyber experts, methodologies, and enemy perspectives to put the security of your systems to the test.

On-Demand ISSO

Access proven cyber subject matter experts on an on-demand basis to help satisfy your most pressing cyber concerns.

Policy Development

Craft or refine security policies to better conform to industry standards and the needs of your company.

Digital Forensics

Retrieve evidence of malicious software, criminal activities, or other misuse with Mission Multiplier's professional analyses of computers and digital storage media.

CMMC/DFARS Compliance

Navigating the path towards regulation compliance can be overwhelming, especially for small- to medium- sized businesses, but we can help your organization every step of the way.

Start minimizing your organization's cyber risk
